DARJAN DIVKOVIC

Senior Frontend Developer

Results-driven Senior Frontend Developer with 5+ years of experience

Designing and building SaaS applications for US and German markets. Specialized in React, Vue, and modern UI/UX practices, delivering scalable, high-performing, and maintainable products.

Proven success in leading product redesigns, driving feature development from concept to launch, and collaborating across design and engineering to enhance user workflows.

Experienced in driving products from inception to trial customers in startup environments, while also thriving within established companies with existing customer bases.

Building Scalable SaaS

Frontend

JavaScript	Vuex
TypeScript	Tailwind
React.js	CSS3 Sass/
Redux	SCSS
Vue.js	HTML5

Backend

Python
Django (entry)
Node.js
Express
Jest, Cypress

Tools

Linux / Windows / Mac
Git (GitHub, GitLab)
Figma
Postman

Career Summary

① Senior Frontend Developer

Kandor Solutions, San Francisco
September 2023 — Present

Spearheaded the redesign of the Headcount Management SaaS application for Workday customers, modernizing architecture, boosting performance, and elevating the overall user experience.

Led end-to-end UI/UX design and implementation with limited direction, building the interface and user journey entirely from the ground up.

Delivered a scalable React front-end supported by a reusable component library, enabling faster feature development and consistent design patterns.

Developed complex request forms with reusable logic and optimized API integrations, improving maintainability and performance.

Expanded skillset into backend development, completing smaller features end-to-end to support full-stack delivery.

Helped Build ATS integrations with Workday (Greenhouse, SmartRecruiters) to automate requisition management and eliminate manual workflows.

Drove product from concept to trial customer adoption from zero through to onboarding of trial customers, wearing multiple hats across product design, development, and delivery.
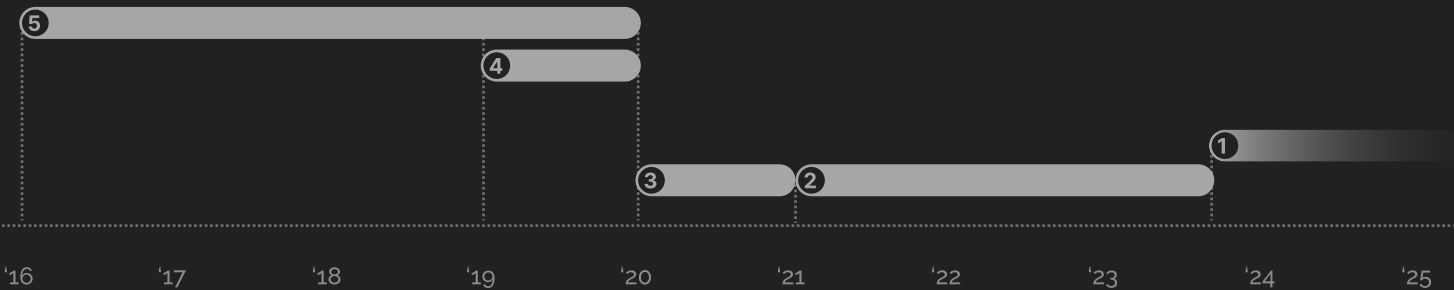

② UI/UX Developer

Pequity, San Francisco
2021 — September 2023

Delivered pixel-perfect UIs while integrating third-party libraries and APIs to extend product functionality.

Collaborated closely with design teams to refine user experience and improve conversion rates across key workflows.

Developed and enhanced numerous front-end product features — both large-scale initiatives and smaller enhancements — ensuring continuous product improvement.

Built Python automation scripts powering marketing campaigns for 8,000+ companies, increasing reach and efficiency.

Contributed to the internal Front-End Guild, establishing best practices, elevating code quality, and driving consistency across the platform.

③ Junior Web Developer

Innoscripta AG, Munich Germany
2020 — 2021

Maintained, debugged, and optimized multiple marketing and client-facing websites, ensuring reliability and performance.

Implemented design solutions that strengthened brand identity and enhanced overall user experience.

Ensured clean, organized, and maintainable code while collaborating within Agile teams.

Assisted senior developers with feature development and testing, gaining hands-on experience in modern web practices.

Built a foundation in front-end development by contributing to diverse projects, learning to balance design requirements with technical execution.
